At First an Introduction

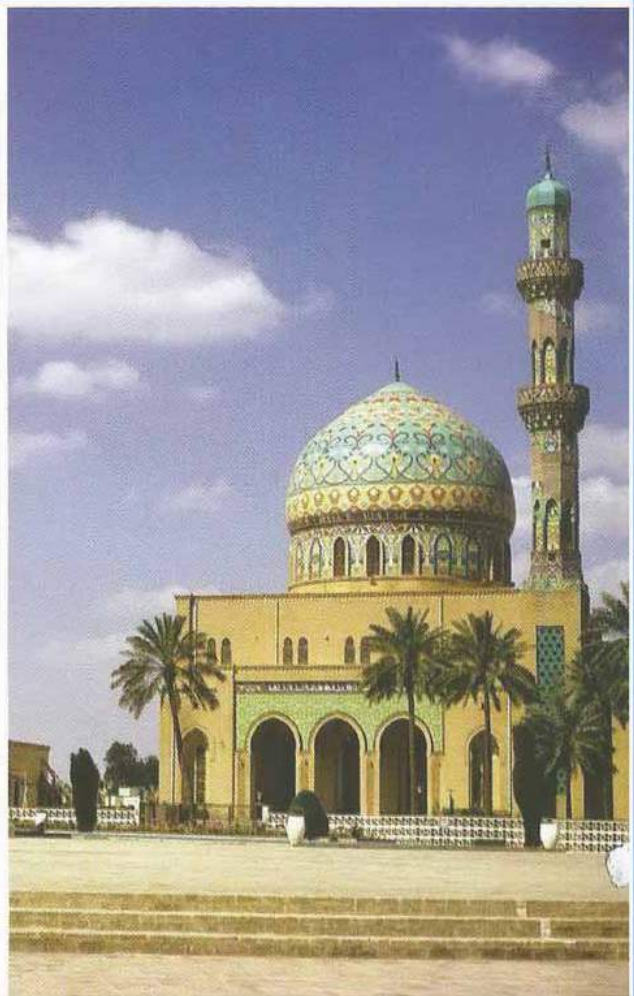

The group of Ansab companies for development and construction is an extension to the moussawi establishment for construction.

It started its work in 1954 in Iraq through the projects that were carried out with the help of god in Baghdad and in all provinces.

And since the start, the group of ansab companies has been distinguished by the accuracy, credibility and the speed in carrying out tasks according to the specifications and conditions which gave it its pure reputation and provided the continuity and piling up expertise through the past decades.

The group works according to the latest system and technologies, and it is committed to the most accurate standards, so that it accompanies the cutting edge technology and going on

Member of Baghdad commerce chamber
Member of the American commerce chamber
Member of the industrial commerce chamber (Iraq - Europe)
Member of the RIRP organization (the German industrial initiative for the reconstruction of Iraq)
Board member of the Iraqi - French employers
Iraqi member of the Chamber of Industry

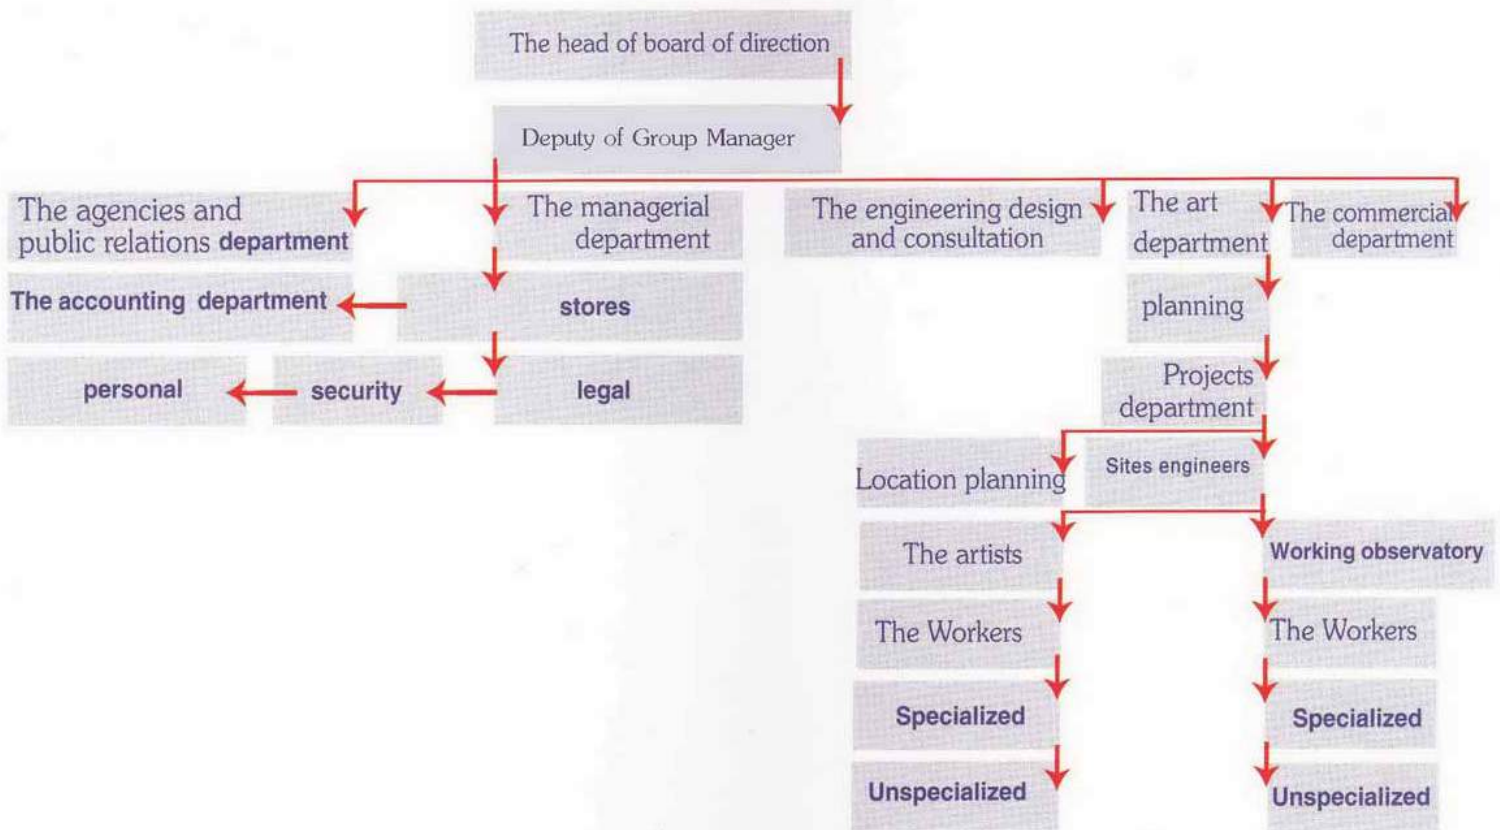

Sami Al-Mousawi
President of
Al-Ansaab's Group of Companies

Building of Al **ANSAB** Business Group

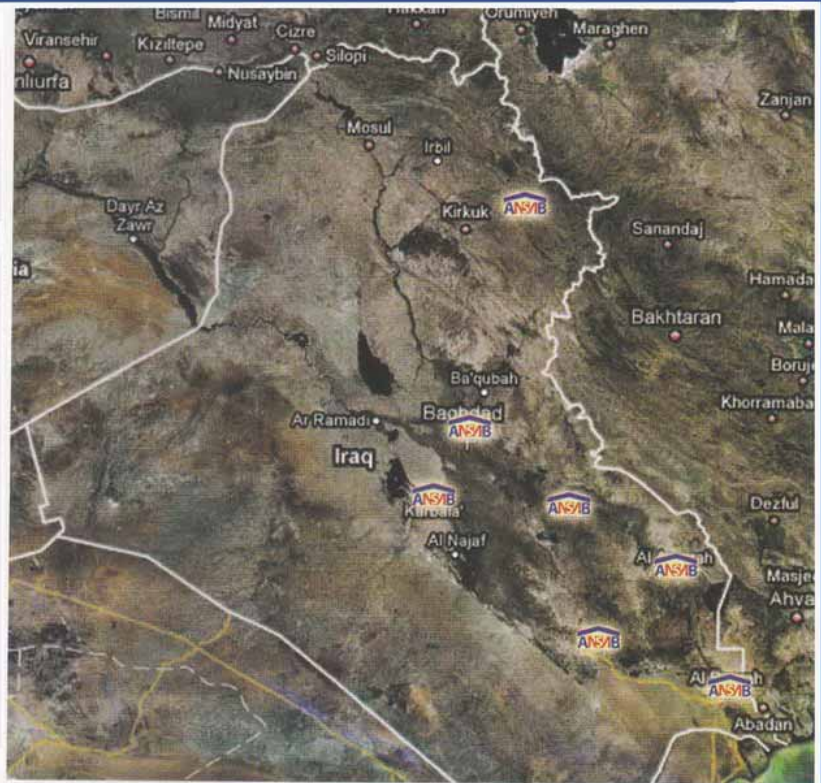

The Managerial Hierarchy of the Group

The Locations of the Group

Inside Iraq

- 1- The headquarter of the group is in Baghdad

- 3- A branch of the group is located in Basra province.
- 4- A branch of the group is located in Karbalaa province.
- 5- A branch of the group is located in Wasset province.
- 6- A branch of the group is located in Missan province.
- 7- A branch of the group is located in Souleimaniya province.

The **Locations** of the Group

Outside Iraq

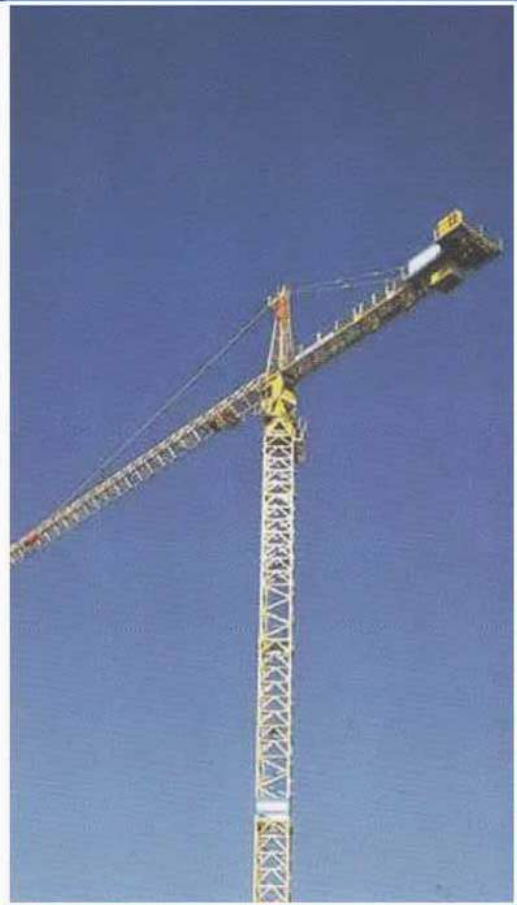

- 1- The office of the group is in Lebanon [Beirut]
- 2- The office of the group is in Jordan [Amman]
- 3- The office of the group is in Turkey [Istanbul]
- 4- The office of the group is in Emirates [Dubai]

Fields of Work of **this Group**

- 1- The limited construction and development Ansab Company.
- 2- The limited Ansab company for the commercial agencies.
- 3- Al Rizk El Wafeer Company for general commerce
- 4- Ansab company for oil and gas.
- 5- The Lebanese Ansab company for the international trade

The Limited

Construction And Development **ANSAB** Company

AL ANSAB BUSINESS GROUP

The Ansab group took part in big projects and construction work in Iraq and outside. It has always been one of the pioneers in the fields given the fact that it has a wide spread experience through half a century.

The projects of the group represent enough evidence to express its ability to creation and standing out of the crowd.

1- The Construction contracts

The projects of construction and housing [building complexes and residential units which are ready with the participation of the group of specialized European companies. Building up first class hotels, building up factories, and building up stores that meet with the required specifications...].

Transportation [building up roads and bridges, dams, railways and airports...]

Education and health [building up hospitals, schools, colleges, universities, engineering, medical and scientific research centers, building up labs and equipping them to meet with the international standards..]

2- Setting up the construction materials

The company prepares all the necessary construction materials, and according to the international specifications

3- Setting up the construction sites

The Ansab group has several commercial agencies that enable it to set up the projects in all the locations including the proper equipment for the working sites and in cutting edge and international specifications.

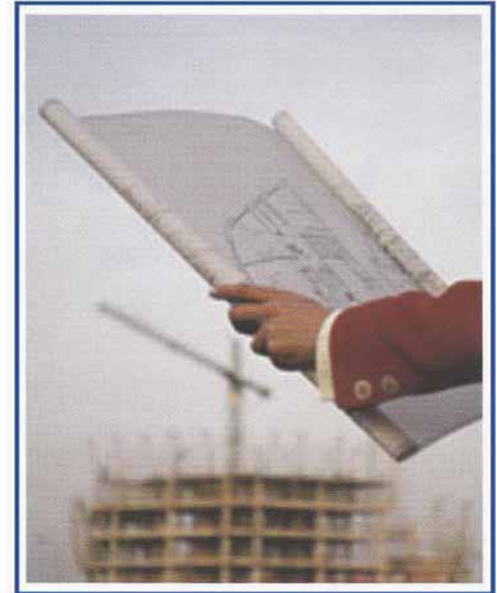

The company sets up and trains the specialized crews in international companies in order to operate the machines and devices.

4- The Internal decoration and furniture

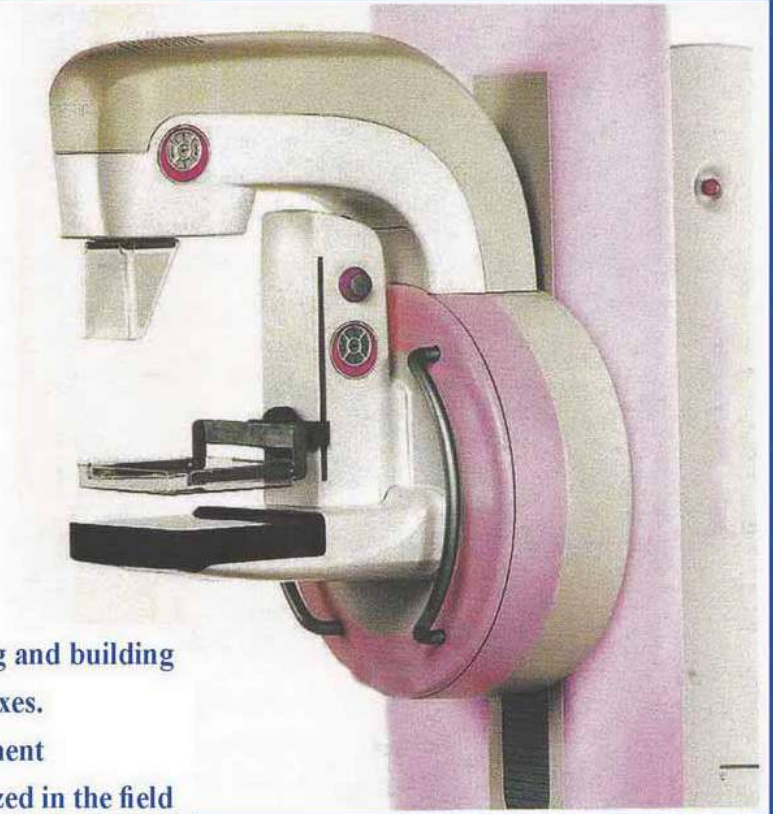

The company has a wide spread experience in the work of furniture and decorations with the touch of cutting edge and state of the art technology. For all the construction sites, offices, companies, hospitals. And schools. and others. Where as the group sets up a study of special needs in every location or site so that to achieve all the decorations, painting, and ceilings and furniture with the latest state of the art instruments available in the local and international market, the company has a complete crew of decoration engineers and electrical and maintenance engineers to carry out the proper tasks where needed from the beneficiary side.

5- The coating and painting works

The company carries out the coating actions to the facades using bricks and ceramics and marmar, and the painting in accordance with the latest designs under the supervision of experienced engineers.

The Field of **Health Care**

- 1- The company carries out the studying, designing and building hospitals and health centers and medical complexes.
- 2- Equipping the hospitals with the medical equipment
- 3- Carrying out all the studies and projects specialized in the field of health.
- 4- The Group has agreements with international companies specialized with equipment and medical appliances.

The Field of **Oil** and **Gas**

Abraj Al- Ansab oil company has been stated as one of the specialized structures standing under the umbrella of the al- Ansab group of companies to organize all efforts and make best use of available potentials to support Iraqi oil industry by expertes, engineering achievements and equipment on quality and price competition bases and to all what may bring the ambitions of Abraj Al- Ansab company to the ground of existence in contribution to the process of building edifice of, and modemizing the items of the Iraqi oil industry by introducing updated technologies and progressive processes.

The general policy of this young but promising company has been traced to proceed in parallel to progress achieved by oil industry of Iraq and development of oil fields and other infrastructures for the coming years and Abraj Al- Ansab company takes all measures and activates all its financial technical and international and local capabilities and relations to humor with the demands of Iraqi oil market in one hand and attaching to the development made in the international oil markets on the other and in order to brind this ambitions in to existence , Abraj Al- Ansab company has established all necessary links with international specializes and professional firms to assure such support.

Abraj Al- Ansab oil servie company has established a staff of Iraqi expertise with long and firm back ground in the oil industry of Iraq and is capable to achieve the general goals and role it deserves through following organization chart.

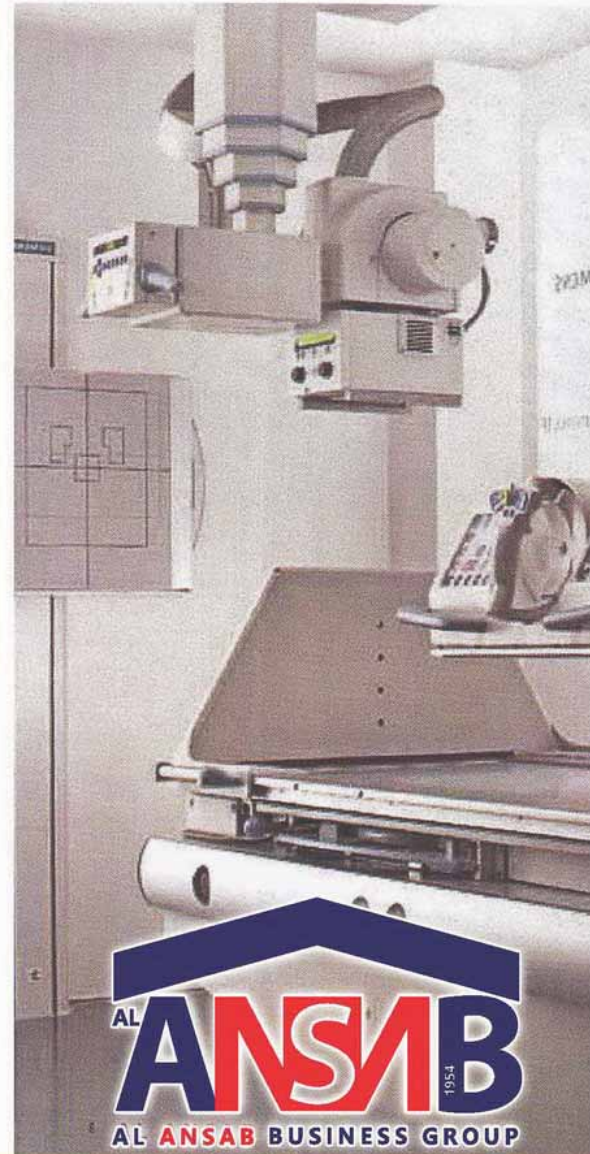

The Field of **Electronics**

- 1- Mechanical work.
- 2- Electrical work.
- 3- Maintenance work.

Our company has a wide spread experience, and it has engineers and specialists who have a high engineering competency in these fields including the materials that are related to manufacturing electronic control panels which comprise all electrical and electronic ingredients as well as the basic electrical and hygiene foundations including setting up and maintaining tanks specially for water which come in all kinds and sizes.

Our specialists excel in equipping and maintaining the electrical and hiegene equipment which are designed specially for dry cleaning and the open up and closed swimming pools, and the equipment for operating the central heating and cooling systems designed to all kinds of buildings as for the specialized team of our company, it handles the roof maintenance in all its kinds whether concrete or ready made building.

Handling the humidity in the buildings [the roofs and walls].

Projects of the Group

Electrical Works

The company has long experience in the implementation of Electrical Works and business mission can be summarized: -

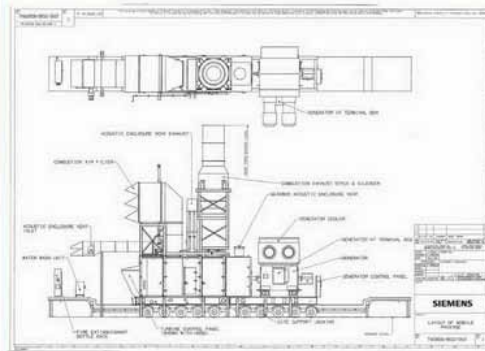

First: - Implementation of network pressure (11 KV) Its Earth-length (5000 meters) size (3 * 150) mm 2 Rameco-type (German) province of Diwaniyah

Containing eighteen modulation box kiosk the capacity each (1000) KV, Production of Lebanese's Matlik company.

In addition to low pressure network (0.4)KV of the project the total length (16,250 meters) tied through the cables of various sizes produced by modern Jordanian company.

And laying telephone network with a total length of 16,000 meters to deliver telephone service for six hundred and fifty-six housing units in addition to the nine buildings, service - through communication cables size of 0.6 mm 2 (starting from 2 - pair to 450 - Pair).

Second: - The project to develop the streets of the city of Nahrawan, where setting 1200 lighting column

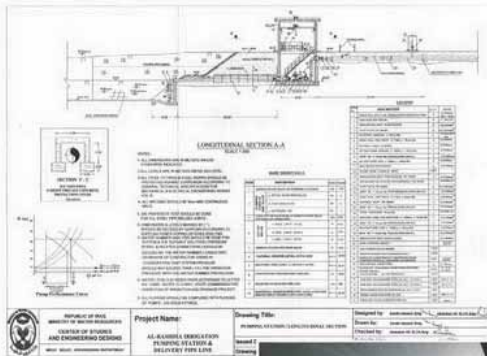

(600 column length of 4 m, 600 column length of 8 meters)

In addition to the setting six pumping stations with all the rain water control panels.

Third: - The group of Companies have partnership contracts with multiple companies specializing electrical works. Currently we working in collaboration with SEMINES company to installing movable power generators in Iraq, its capacity reaches to 20 MW run on crude oil and are installed to cover the total

Projects of the Group - Electrical Works

Fifth: - Supplying the Ministry of Industry and Minerals / Diyala General Company for Electrical Industries, iron to carry power, Korean origin company - Posco - to manufacture of iron core for transformer and run a production line transformer of (equipped quantity)
